

## Catrike frame warranty for aftermarket electric-assist motors

Catrike frames are covered under a 5-year warranty with our Bosch eAssist system to the original owner. This is a Class 1 motor that is regulated to 20 mph and pedal assist only. Any bolt on Class 1 system with motor 500-watts and under, will be covered under the Catrike frame warranty.

Modifying your Catrike with a non-Class 1 eAssist will not void the warranty. However, if it is determined that the modification altered the structure of the frame or caused a failure outside of a manufactured defect, your frame will not be covered.

Please see Catrike Limited Warranty for additional information.
