

## How do I transport my Catrike?

All Catrike models will fit in most mid-to full size SUV's or hatchback vehicles with the back seat folded down. The Dumont, 5.5.9 and Trail have folding frames, so transport is easier for these models. (See video "How to fold your Catrike" <https://youtu.be/TINggOons30>)

If you choose to transport your Catrike on a rack mounted to the rear of your vehicle, there are a few rack manufacturers that make racks specifically for tadpole trikes like the Catrike.

### **Hitchrider Racks**

[www.hitchrider.com](http://www.hitchrider.com)

This company makes several trike racks as well as trike/bike combinations for multi-use.

### **Atoc Rack**

[www.atoc.com](http://www.atoc.com)

This company manufactures the "Draftmaster" style rack for one or two trikes.

### **Let's Go Aero**

<https://www.letsgoaero.com/collections/bicycle-carriers/products/triquad-trike-quad-ebike-carrier>

This company makes hitch mounted racks for trikes as well as quads.

Trike dimensions, folded and unfolded, are listed in each Catrike's specification section on our website [www.catrike.com](http://www.catrike.com)
