

What year is my Catrike?

- To determine the manufacture year of a Catrike, you need the serial number. Trikes manufactured before 2013 have a decal on the bottom of the main frame tube with the serial number on it. It is a combination of three letters and numbers. (i.e. CTV1203 for Villager 1203)

Trikes manufactured after 2013 have the serial number engraved on the main frame tube. Space frames (700, Expedition, Pocket and Eola) have the serial number engraved on the bottom of the main frame tube towards the rear. Trikes with an adjustable seat have the serial number engraved on top of the main frame tube towards the rear. The serial number is a combination of five numbers. (i.e. 34881)

Once you have located the serial number, you can find out the manufacture year by contacting Catrike at info@catrike.com and one of the customer service representatives will assist you.
