What tire size fits my Catrike?

- All Catrikes (except the 700) come with the same tires from the factory. The tires we use are **Schwalbe Marathon Racer** tires in either 26 X 1.5 or 20 X 1.5 depending on the model and front/rear wheel configuration. The Catrike 700 comes standard with **Schwalbe Durano** tires in 20 X 1.1 and 700 X 23C.

  We have tested all Catrike models, except the 700, with tires up to 2.0 width. This width will still give you the ability to use the rear fender without any issues. Going up to a larger volume tire or courser tread will reduce the ability to use rear or front fenders and will increase the chance of the rear derailleur rubbing the tire on 20 inch rear wheel trikes.

  To find out which tire works best for you, try different styles and brands that match your riding style and environment.

  Be aware that different brands can measure differently from one another. One 20 X 1.5 could be wider or taller than another with the same noted dimensions.
