

Can I tow a trailer with my Catrike?

- Most cargo- or pet trailers will work with a quick release style dropout. To use a trailer with any of our thru-axle trikes (Dumont, 700, 5.5.9, Expedition and Eola), you will need to contact the trailer manufacturer and inquire about adapters and to ensure compatibility.

Catrike cannot guarantee the performance of your trike when after-market parts or components are installed. Some modifications may affect the manufacturer's warranty.
