

## **What is the weight limit of my Catrike?**

- The weight limit of every Catrike model is 275 pounds. The only model with a 225-pound weight limit, is the Pocket. That weight limit does not include 50 pounds of cargo that you can bring with you. Please be cautious to not overload your Catrike as it may affect stability and the performance of your brakes.

When carrying cargo on your trike, make sure to keep your tires inflated to the recommended PSI for the tires you are using. The recommended pressure for Catrike stock tires is between 55 and 80 PSI. (85 and 105 for the 700). Under-or over inflating your tires while carrying cargo can affect the longevity of your tires.
