

Dear Catrike Customers,

Starting June 1, the prices of all Catrike products will increase by up to 10%. This adjustment allows us to uphold our renowned quality and sustain operations amid evolving global market conditions.

As a proud U.S. manufacturer, we continue sourcing components from leading suppliers while navigating many challenges in the bike industry and international tariffs. To support domestic manufacturing and promote the joy of riding, we are actively working with the National Bicycle Dealer Association and People for Bikes to find sustainable solutions for the cycling community.

Now is the perfect time to lock in current pricing to kick off your summer adventures on your new Catrike.

Find your local dealer and schedule a test ride.

Happy Trails,
The Catrike Team
