

Dear Catrike Customers,

As a U.S. manufacturer, we source components from leading cycling suppliers overseas which are subject to new international tariffs.

Therefore, effective June 1, the prices of all Catrike products will increase by up to 10%. This strategic adjustment is essential to maintaining our commitment to our renowned quality and ensuring operational sustainability amid evolving global market conditions.

We are actively working on viable solutions and collaborating with NBDA and People for Bikes to advocate for stronger domestic manufacturing opportunities and promote the joy of riding Catrikes.

Now is the perfect time to lock in current pricing to kick off your summer adventures on your new Catrike.

Happy Trails,  
The Catrike Team
